836

2) The take over of the power supply system in Bombay Karnatak area from Bombay Electricity Board, has now been fixed for the midnight on the 30th April 1957. The allocation of personnel has also been accepted. The allocation indicates the staff that has opted out for transfer to new Karnatak area and therefore essential personnel will to be posted immediately.

3) The CEE has furnished a list of essential staff proposed to be filled up immediately either by transfer of personnel from the existing staff or by direct recruitment and requests sanction of Govt to take action. The proposal of the CEE to take action for posting essential personnel may perhaps be approved.

Dep Sec (P&E) — P Baldaya, M&E 8/3

(4) Secretary may please see. On the 30th April mid night, the undertakings of the Bombay Electricity Board in the Ex-Bombay-Karnatak area will be taken over by the Mysore Government Electricity Department. It is stated by the Chief Electrical Engineer that the number of posts that will be transferred to us for running these undertakings will be more than the number of men that will be transferred to us. Under each category, on the date of transfer, there will be vacancies as shown by the Chief Electrical

Serial No.

Engineer in page 2 C.F. This would mean that these posts will be transferred to us as vacancies and men will not be transferred to us in these posts. This will have to be confirmed by the S.R.D.,

(5) The Chief Electrical Engineer's proposal is that in order to run the undertakings satisfactorily, we should have trained persons to fill these vacancies on 1st May 1957. But, as the required staff will not be coming to us from the Bombay Electricity Board, we will have to keep ready trained staff to fill those vacancies. The Chief Electrical Engineer's suggestion is that the corresponding to the number of vacant posts that will be transferred, we may recruit men and train them for some period atleast, so that they may be ready to take over the undertakings on the midnight of 30th April 1957. If the proposal of the Chief Electrical Engineer is sanctioned, say with effect from 1-4-1957, it would mean that the Government would be incurring extra expenditure on the salaries to these officers and officials for a period of one month, afterwards they can be adjusted against sanctioned posts that will be transferred to us as vacant posts from the Bombay Electricity Board.

(6) The Chief Electrical Engineer has not given the financial implications of his proposal. He states that they are being worked out. I am doubtful whether the Finance Department will agree to the proposal, if we do not state what will be the extra expenditure that will be incurred and to which head, it will have to be debited. So far as the vacant posts of Assistant Engineers, General Line Foreman, Assistan Operators, Line Inspector etc., are concerned, I

Serial No.

feel that from the provisinal seniority list which we have already got, we may ~~xxxxxxxxxxx~~ send the senior most in an incharge capacity against these posts or we may post serving officers of corresponding rank to these posts and in the vacancies created in the chain. we may make in-charge arrangement. As regards Engine Drivers, probably, they may not be available in our service. Therefore direct recruitment might have to be made.

Line men, wire men, Line helpers, Sub station helpers, street light ~~cheque~~ checker, oil men are ~~of~~ posts for which probably men are available in our service.

(7) Before we send the proposal to Finance Department, I suggest that the Secretary may call urgently ~~for~~ the Chief Electrical Engineer for a discussion.

Secy (PW&Elec)

(8) The Chief Engineer, Electricity, has proposed that in view of the impending transfer of the electrical undertakings in the Bombay-Karnatak area (which are now being managed by the Bombay Electricity Board) to the Mysore Electricity Department, certain staff from Mysore State has to be posted in advance, at least for a period of one month, so that the Mysore personnel may get acquainted with the working of the undertakings in that area. He feels that this is particularly necessary because most of the staff belonging to the Bombay Electricity Board and now working in the Bombay-Karnatak area has been allotted to the Bombay Board and only a small staff is being

1314

Serial No.

allotted to Mysore. The result will be that on the date of taking over, there will be a number of vacancies which will have to be filled by personnel of the Mysore Electrical Department unless the Bombay Electricity Board staff allotted outside Mysore is to be continued on an agreed basis for some time after the taking over.

9

I have discussed these proposals with the Chief Engineer, Electricity. The date of taking over has been mistakenly reported by him as 30-4-57. The actual date is 1-4-57 as agreed to at the Inter-State Conference held at Bombay late last month. In the light of the discussions the following proposals are made:-

(1) Staff as below may be sanctioned for a period of one month to work in the Bombay-Karnatak area in addition to such staff of the Bombay Electricity Board as might, on an agreed basis, be continued in that area so as to enable the Mysore Staff to acquaint themselves with the work and to carry on operation and maintenance on a satisfactory basis after the Board staff allotted outside Mysore is relieved at the end of that period:-

(1)	Assistant Superintendents	3	Rs. 250-600
(2)	General Line Foreman	1	Rs. 100-10-200
(3)	Senior Operators	5	Rs. 150-10-300
(4)	Operators	2	Rs. 150-10-250
(5)	Line Inspectors	5	Rs. 70-150
(6)	Power House Foremen	2	-do-
(7)	Electricians	6	-do-
(8)	Engine Drivers	7	Rs. 75-5-125
(9)	Engine driver-cum-Switchboard Operator	1	-do-
(10)	Linemen	13	Rs. 50-4-70
(11)	Wiremen	3	-do-

Note.—Contn. Sheet

			Serial No.
(12) Line Helpers	14	Rs. 30-50	
(13) Sub-Station helpers	4	Rs. 30-1-40	
(14) Street Light checkers	2	Rs. 25-1-35	
(15) Oilman	1	-do-	

10/2. The above-mentioned staff will be placed in position as soon as possible - if possible even before the date of taking over, namely, 1-4-57 - and will work alongside the Bombay Electricity Board Staff. On and from 1-4-57 such of the Bombay Electricity Board staff as are allocated outside Mysore State and as are absolutely necessary to be retained in Mysore area in order that the system may be operated satisfactorily will be continued on a basis to be agreed on between the Chief Electrical Engineer, Mysore and the Bombay Electricity Board. The strength of such staff which is to be continued on a temporary basis will not exceed the strength now proposed to be sanctioned.

11/3. To the extent that vacancies exist on and after 1-4-57, the staff now sanctioned will be shown against those vacancies. To the extent that vacancies do not exist, they will be continued for a period not exceeding one month on the whole under these sanctions.

12/4. The extra cost involved arising partly from the creation of posts for a short time in addition to those that already

1314

PWD-8-SEB-57.

Transfer of staff of Bombay Electricity Board.

exist under the Bombay Board and partly out of the necessity to continue such of the Bombay Electricity Board staff as is not allotted to Mysore for a period not exceeding one month for work in Mysore area. The expenditure involved is roughly Rs. 8,500/- on account of the former and is expected to be about the same on account of the latter. The total additional expenditure may not, however, exceed Rs. 20,000/-.

B A N G A L O R E.

2/3/57

Sir,

Subject:- Transfer of staff from Bombay Electricity Board.

In enclosing herein a finalised balance sheet of staff as handed over to us by the Chief Engineer, Bombay Electricity Board, I write to state that the allocation of personnel as shown therein has been accepted by us and may kindly be confirmed. The allocation indicates the actual position with regard to the staff that has opted out for transfer to non-Karnatak areas and the vacancies left over in the several grades after deducting the incoming members in each category. The Board authorities have indicated that they would require to transfer this staff from our Karnatak area gradually and had requested us to try and fill up these vacancies prior to take over which has now been fixed for the midnight on the 30th of ~~April~~ March 1957. While executive senior personnel could be directed to report and take charge a day or two before transference, considerable difficulty will be experienced in the operation of the system if personnel like Engine Drivers, Power House Foremen, etc., are not posted well in advance. It will therefore be very necessary at this stage to make immediate arrangements for replacement of certain essential staff so that they can start working at least a fortnight before the take over in order to get themselves acquainted with their operational duties.

The staff to be replaced has now been divided into two broad categories, viz., (1) essential personnel who have to be posted immediately. and (2) personnel who can be replaced later in the

P.T.O.

vacancies created consequent to the transfer of staff to non-Karnatak areas.

In the existing system 4 Dy.Executive Engineers have been indicated; 2 will be opting out, leaving us only two. So also under Assistant Engineers; out of the 13, three will be opting out. Inasmuch as the duties attached to the 2 Dy.Executive Engineers who are opting out are similar to those now done by the Assistant Engineers, it is proposed to fill up all these 5 vacancies by Assistant Engineers.

The list of essential staff is as follows:-

1) Assistant Engineers	--	5	3
2) General Line Foreman.	--	1	1
3) Sub-Engineers.	--	5	5
4) Assistant Operators	--	2	2
5) Line Inspectors	--	5	
6) Power House Foremen	--	2	
7) Electricians	--	6	
8) Engine Drivers	--	7	
9) Engine Driver-cum-Switchboard Operator	--	1	
10) Linemen	--	13	
11) Wiremen	--	3	
12) Line Helpers	--	14	
13) Sub-station Helpers	--	4	
14) Street Light Checkers	--	2	
15) Oilman	--	1	

The balance of vacancies could be conveniently filled up during or after the take over.

In this connection it has to be stated that the above staff have to be appointed immediately either by transfer of personnel from the existing staff or by direct recruitment. It is proposed to fill up the higher salaried posts by transfer from the existing system in order to give a chance of promotion to people in lower grades and to fill up the lower paid employees from personnel available in the locality. In cases where it may not be possible to make proper replacements before the hand over, the Bombay Electricity Board will have to be requested to lend the services of their officials for a definite period debiting the charges therefor to us. The Chairman and the Chief Engineer, Bombay

Electricity Board had indicated their willingness to this arrangement. Even so, it will be necessary that our personnel will have to go into positions at the earliest in order to see that continuity of service is ensured.

The staff appointed to several places will be on a tentative basis absorbable in the vacancies to be created by the outgoing staff with due consideration of seniority. Personnel transferred from our State to the Board area will be on scales of pay prevailing in Mysore State, while personnel recruited locally will be according to the prevailing salaries paid by the Electricity Board. In order to avoid discrimination being made from differential salaries to staff doing the same kind of work, it will be necessary, as early as possible after the take over, to bring the whole establishment in line with the revised scales of pay prevailing in Mysore State.

In order that appointments and transfers may take effect at the very earliest, sanction of Government may kindly be obtained and communicated for my action as indicated above. The financial implication based on the scales of pay prevailing in Mysore State are being worked out.

In this connection it has to be mentioned that unless we are able to send our officials early to undergo training and obtain sufficient experience for discharge of the duties, it will be necessary for us to retain the services of the existing personnel of the Board area to train up recruits or transfer personnel from this State. This will be an additional expenditure. As such I would request that early sanction of Government may kindly be obtained and communicated so that immediate action may be taken for posting the key personnel required. The replacement of other non-essential staff will be taken up after the undertaking is taken over from the Bombay Electricity Board. The entire establishment could be reorganised to fall in line with the Mysore

P.T.O.

Electricity Department after examining the extent of duties and the personnel available for the performance of each.

Yours faithfully,

(J.L.D'Sa),
Chief Engineer, Electricity

PUBLIC WORKS BRANCH

Dear Shri Agarwal,

Please refer to your D.O.No.SR/ELC.1056-I, dated, 23rd February 1957, forwarding minutes of the meetings of the representatives of the Government of India, Bombay, Madhya Pradesh, Mysore and Rajasthan, held at Bombay on the 17th and 18th February 1957, to discuss the reconstitution of and principles for the division of assets and liabilities of the Bombay Electricity Board and Madhya Pradesh Electricity Board. I would suggest that the following two points may be incorporated in the minutes of the meetings:-

1. It was agreed during the discussions that the date of dissolution of the Bombay Electricity Board should be 1-4-1957. This may be incorporated in the minutes.

2. Paragraph II(a) - (iii) of the minutes - under Liabilities(Loans):- This para sets forth the recommendations of the earlier discussions which stand modified by the later recommendations indicated in paragraph (iv) relating to "Revenue deficit after providing for interest on capital and for depreciation."

The fact that para (iv) modifies para (iii) may be clearly indicated.

Yours sincerely,

K Bala Subramanyam 4/3

(K. Balasubramanyam).

Shri J. C. Agarwal, I.A.S.,
Deputy Secretary to the Government of Bombay,
Political & Services Deptt.(S.R.D.)
Sachivalaya,
BOMBAY. 174/57-7 4/3

Copy to the Secretary to Govt. P.W.D. & Elec.

Proceedings of the Government of Mysore.

R e a d:-

Letter No.81891 dated the 6th March 1957 from the Chief Engineer, Electricity, reporting that consequent on the dissolution of the Bombay Electricity Board with effect from the 1st April 1957 and the handing over of the electrical undertakings in Karnatak area to the Government of Mysore Electrical Department some staff as noted in the accompanying statement has to be posted immediately either by transfer of personnel from the existing staff or by direct recruitment, that it is proposed to fill up the higher salaried posts by transfer from the existing system in order to give a chance of promotion to people in lower grades and to fill up the lower paid employees from personnel available in the locality and that in cases where it may not possible to make proper replacements before the hand over the Bombay Electricity Board will have to be requested to lend the services of their officials for a definite period debiting the charges therefor to the Electrical Department, the staff appointed to several places will be on a tentative basis absorbale in the vacancies to be treated by the outgoing staff with due consideration of seniority and the personnel transferred from this State to the Board area being on scales of pay prevailing in Mysore State, while personnel recruited locally will be according to the prevailing salaries paid by the Electricity Board and therefore requesting for approval of Government to the action taken by him as noted above.

Order No.PWD8SEB57

Dated, Bangalore 13/16 April 1957.

The action taken by the C.E.E. is approved. This arrangement will be only for a period of one month and the total expenditure involved should not exceed Rs.20,000/-

For Secretary to Government,
Electrical Department.
